WALT: Compare and order decimals and fractions

Vocabulary

part

whole

decimal

fraction

equivalence

compare

order

ascending

descending

Prior learning:

What does equivalence mean?

Find as many equivalent fractions as you can for:

0.5

0.25

0.1

Write this decimal as a fraction:

$$0.64 = \underline{\hspace{2cm}}$$

Vocabulary

part

whole

decimal

fraction

equivalence

How could we represent this?

Write this decimal as a fraction:

$$0.78 = \underline{\hspace{2cm}}$$

Vocabulary

part

whole

decimal

fraction

equivalence

How could we represent this?

What do I know?  
What do I need to find out?  
How else could I represent this?

Vocabulary  
part  
whole  
decimal  
fraction  
equivalence

decimal  
fraction

What do I know?  
What do I need to find out?  
How else could I represent this?

fraction  
equivalence  
compare

Fill in with the missing symbols < > =

$\frac{2}{10}$

0.5

What do I know?  
What do I need to find out?  
How could I represent this?

Vocabulary

part  
whole  
decimal  
fraction  
equivalence  
compare

Fill in with the missing symbols < > =

$\frac{7}{10}$

0.75

What do I know?

What do I need to find out?

How could I represent this?

Put these in **ascending** order:

1.4     $4\frac{1}{4}$     4.1    4.4

Vocabulary

whole

decimal

fraction

equivalence

compare

order

ascending

descending

What do I know?

What do I need to find out?

How could I represent this?

John has walked 3.5km.

Sally has walked  $3\frac{4}{10}$  km.

Who has walked further? Explain your answer.

Vocabulary

part

whole

decimal

fraction

equivalence

What do I know?  
What do I need to find out?  
How could I represent this?

Hinge Question

Put these in **ascending** order:

1.3       $1\frac{1}{10}$        $3\frac{1}{5}$       3.1

## Try it

1. 

$0.92 = \text{---}$
---------------------

$0.78 = \text{---}$
---------------------

$0.21 = \text{---}$
---------------------
- |                     |
|---------------------|
| $0.22 = \text{---}$ |
|---------------------|

$0.11 = \text{---}$
---------------------

$0.14 = \text{---}$
---------------------

2. Write these decimals as mixed numbers  
(whole and fraction)

1.2km

5.75m

25.5kg

4. Order these from the largest to the smallest

$3\frac{1}{5}$    3.5    $1\frac{3}{5}$    1.3

3. Fill in the missing symbols (<, > or =).

$$\frac{1}{10} \square 0.75$$

$$0.4 \square \frac{1}{4}$$

$$0.5 \square \frac{1}{5}$$

$$\frac{3}{4} \square 0.75$$

$$0.8 \square \frac{4}{5}$$

$$\frac{1}{2} \square 0.2$$

## Use it/prove it

For each question, draw and representation and explain how you know your answer is correct.

1. Here are two parcels:

What is the total combined weight of the parcels, in kilograms?

2. My brother weighs 27.3kg. I weigh  $27\frac{1}{2}$ kg. How much more than my brother do I weigh?
3. Year 6 set off on a  $2\frac{3}{4}$ km woodland walk. By lunch, they had walked 1.75km. How much further do they need to walk?
4. Sammie bought a bottle of Diet Coke. She drank 0.4 litres of the bottle. She spilled 0.9 litres of the bottle. How much liquid has left the bottle altogether? Answer in a fraction.
